

THE BIOLOGY OF HUMAN REPRODUCTION

BIO 2003.01S (32277)
 CRAIG T. JORDAN Ph.D.
 SUMMER, 2007
 M - F 11:00 - 12:30
 BB 3.01.12

July		
9	Introduction	pp. 1-17; Supp. 684-695
10	Female Gross Anatomy	Supp. 701-702, 810-811, 813
11		
12	Male Gross Anatomy	pp. 18-25; Supp. pp. 671-683
	Genetics	p. 26
13	Sex Differentiation	pp. 27-31; Supp. 702-710
		Supp. 796-801
16		
17	Cell Biology	
	Female Neuro-Hormonal Physiology	pp. 32-36; Supp. 711-719
	Movie: <i>Miracle of Life</i>	Supp. 801-805, 811-818
18	Male Neuro-Hormonal Physiology	p.37
19	Sexual Behavior	Supp. 818-820
	Sex Dysfunction	
20	Fertilization; Movie: <i>Life's Greatest Miracle</i>	pp. 38-39; Supp. 695-700, 821-
822		
	Embryonic Development	pp. 40-42; Supp. 51-63, 823-824
23		
24	Movie: <i>How Babies are Made</i>	
	Fetal Development	pp. 43-44; Supp 63-68
	Embryo Experimentation	
25	Review (from 11:00 until 11:30)	
	First Exam (beginning at 11:30)	
	(This exam will cover material through "Sexual Behavior, Sex Dysfunction")	
26	Fetal Tissue Transplantation	
	Maternal Physiology During Pregnancy	
27	Biological Clocks and Child Birth	Supp 700-701, 824-826
	Post-natal Development	pp. 45-46; Supp. 826-828
	Puberty and Subsequent Development (Aging)	pp. 47-52; Supp. 828-834
		pp. 53-59; Supp. 820-821
30		
31	Birth Control	
August		
1	Abortion	pp. 60-63
2	Infertility	
	Fertility Enhancement	pp. 64-75
3	Review (from 11:00 until 11:30)	
	Second Exam (beginning at 11:30)	
	(This exam will cover material covered since the first exam and through "Puberty...")	
6		
7	Sexually Transmitted Diseases	
8	Immunology	
9	Human Immunodeficiency Virus	
10		
13		
14 (Tu)	Final Exam (10:30 - 12:30; Note that even though more time is allotted in the course schedule for our final, you have a limit of two hours to complete the exam.)	

(Check your final exam schedule for all your classes. You may find that you have an unmanageable number of finals scheduled for a single day during the week of final exams. If so, make the appropriate adjustments now; do not try to reschedule final exams later. Occasionally the University adjusts its working hours because of inclement weather. If that impacts this course, consult 458-SNOW and the ASAP websites for information.)

Office Hours: Monday and Thursday, 12:30 - 1:30 P.M., and by appointment (SB 4.02.40).

Textbook: There are two required booklets: *The Biology of Human Reproduction* and *Biology of Human Development* (Sherwood above). There will also be selected readings of original literature from the subscription service accompanying the Sherwood text.

Library Reserve: Copies of both textbooks are on reserve in the library.

Attendance: Attendance is mandatory, but not recorded. You are responsible for any substantive or procedural (eg. alterations in the exam schedule or reading requirements) information given in class. In the event you are absent from a class, do not look to the instructor to repeat for you personally what has already been presented to the larger class. When you are in attendance, please refrain from talking or engaging in any other conduct that may be distracting to fellow students while class is in session. Audio headsets, PDS's and empowered mobile phones are not permitted in class. Laptop activity must be directly related to activity in this classroom. If you can not conform to these restrictions, you must leave the classroom. Continued enrollment in this class represents your agreement to these conditions.

Exams and Grading: There will be three, multiple choice exams. The first two exams will have 50 multiple choice and true/false questions; these exams are not comprehensive. The third and final exam will be composed of 100 questions. The first two exams each accounts for one-quarter of the course grade and the final exam accounts for one-half of the course grade. Approximately two-thirds of the final exam will cover the final third of the course and the remaining one-third of the exam will be drawn from the first two exams. You will need to use a ParSCORE scantron (F-1712-ERI-L) for the exams. Should you arrive to take any exam after the first person to sit for the exam has left the room, you will not be permitted to take that exam, regardless of the amount of time remaining. Examination scantrons and grades will be returned ONLY during class periods. Keep your scantrons until the end of the semester. Your scantron is the only record of your responses that will be graded.

Grades will be awarded as follows:

A: 85% and above B: 75 - 84% C: 65 - 74% D: 55 - 64% F: 54% and below

Be aware of the published deadline for withdrawing from the course and getting an automatic grade of W. After that date, if your grade average is an F, you will receive that grade as your final course grade.

Examination Instructions: The following are the instructions that will apply to your exams. (Note that time and number-of-questions will differ depending on the exam.) I suggest that you read them carefully prior to coming to the exam so that you will have the maximum possible time to answer the exam questions and not be handicapped because of unfamiliarity with these instructions.

This exam is a closed-book exam. You are not to use any materials nor receive or give any assistance to another student while taking the exam. You are not to discuss the exam with any student in either section of this course until the graded exams are returned. Violation of these stipulations will result in a grade of zero on your exam. You are expected to be familiar with the University's honor code and to adhere to that code and be bound by its prescriptions.

1. You are to use an unwrinkled, ParSCORE (F-1712-ERI-L).
2. Enter your name and three-digit ID number () in the last three spaces of the "ID number" field on your scantron and darken the corresponding slots.
3. Darken the slot corresponding to your test form in the space provided on your scantron.
4. There should be no extraneous marks on your scantron; erasures should be clean.
5. There is a time limit on this exam. You will have fifty (50) minutes to complete the exam. This fifty-minute period will begin to run when the class is so instructed. Therefore, should you arrive late to the exam, you will still have to turn in your exam by the expiration of that same fifty-minute time period
6. For each question on this exam, select the one best answer darken the corresponding slot on your scantron AND INDICATE YOUR SELECTION ON YOUR EXAM BOOKLET.
7. Pass in your scantron as you leave; keep your exam booklet. Your scantron is the only record of your responses that will be graded.

Make-up Exams (those administered after the time of the scheduled exam): If you anticipate being absent for an exam, it may be possible to arrange for you to avoid taking a make-up exam and instead take the same exam that the rest of the class is scheduled to take but only if you arrange to take that exam prior to the scheduled exam time. Make-up exams are only available to (a) those that have made arrangements with me prior to the scheduled time of the exam, and (b) those who, within a few days of the missed exam, can substantiate that through no fault of their own they were unable to attend an exam as scheduled. ("Through no fault of their own" includes such things as illness, emergency military service and auto accident in route to class but does not include such things as absence due to penal incarceration, heavy traffic, misreading of the syllabus and oversleeping). A request for a make-up exam must be made in writing as soon as practicable after the missed exam. Evidence supporting your claim of no-fault will be required. A request for a make up does not automatically qualify you for a make-up exam; permission MUST be granted to those who the instructor determines meet the qualifications for a make-up exam. For those who do qualify and receive instructor approval to take a make-up exam, a one hundred-question exam will be available in the Department of Biology office on August 10. That exam will cover the material that was the subject of the first two exams. You will need to provide a new scantron for that exam. WHILE THESE GUIDELINES WILL SERVE TO DEAL WITH MOST INSTANCES WHERE THE AVAILABILITY OF A MAKE-UP EXAM IS AT ISSUE, THE INSTRUCTOR RETAINS COMPLETE DISCRETION ABOUT THE ULTIMATE AVAILABILITY OF SUCH EXAMS.

Receiving Exam and Course Grades: You will not be able to receive your grades by telephone or e-mail. Your grade on the first two exams will be posted in the classroom. In addition, you should determine your grades by inspecting the choices you selected on your exam booklet and following the directions published with the exam key that is distributed after taking the exam. Any dispute of the posted grade must be made promptly in writing.

You can receive your final exam and course grades by either: a. leaving me a stamped, self-addressed card or envelope; b. coming by the classroom, after noon, two days after taking the final exam and inspecting the grades posted outside the classroom; c. waiting for the grade report sent by the registrar's office.

Every student is expected to be familiar with The University's stance regarding scholastic dishonesty:

"The University expects every student to maintain a high standard of individual integrity for work done. Scholastic dishonesty is a serious offense which includes, but is not limited to, cheating on a test or other class work, plagiarism (the appropriation of another's work and the unauthorized incorporation of that work in one's own work), and collusion (the unauthorized collaboration with another person in preparing college work offered for credit). In cases of scholastic dishonesty, the faculty member responsible for the class may initiate disciplinary proceedings against the student." My position regarding scholastic dishonesty is that such behavior is intolerable. Among my obligations as a faculty member are that I am to do my best to assure that the performance of a student be evaluated fairly and that all students be treated similarly. Acts of scholastic dishonesty are inconsistent with both and will be dealt with severely.
